Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-16, drawn to a basting apparatus, classified in class 99, subclass 345.

II. Claims 17-20, drawn to a method for cooking a food product, classified in class 426, subclass 523.

The inventions are distinct, each from the other because:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus of Group I as claimed can be used to practice another and materially different process, e.g. for use in smoking food with smoldering wood chips or sawdust placed in the pan.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art requiring separate searches as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
